THE BLOCKCHAIN FOR REAL WORLD APPS

Simplicity. Speed. Safety

Problems for Blockchain Adoption

Both financial and non-financial industries are increasingly willing to adapt to blockchain technology. However, **the technical complexities and operational overhead** involved in creating, configuring, and operating a blockchain and maintaining its infrastructure often act as a barrier.

Blockchain requires **huge investment** when it comes to setting up infrastructure and maintaining it. It is much more resource intensive, as compared to traditional databases. It also consumes a huge amount of energy and requires huge bandwidth.

Why V Systems

A blockchain infrastructure provider with a focus on database and cloud services that are SCALABLE and DURABLE, with HIGH FINALITY, PERFORMANCE, and HIGHEST RESISTANCE to 51% attack.

Ease of Use

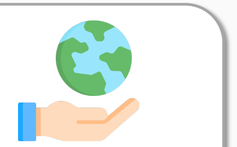
Our development platform makes blockchain technology as user-friendly as possible and greatly ease the burden for developers while exceeding project requirement.

Institutional Blockchain Tool Kits

A comprehensive selection of infrastructures and tools that suit the business needs across industries with Multi-Signature, Hot/Cold Wallet, and White & Blacklisting features.

Customized Smart Contract

Highly customizable and efficient smart contracts for business to achieve transparency and traceability

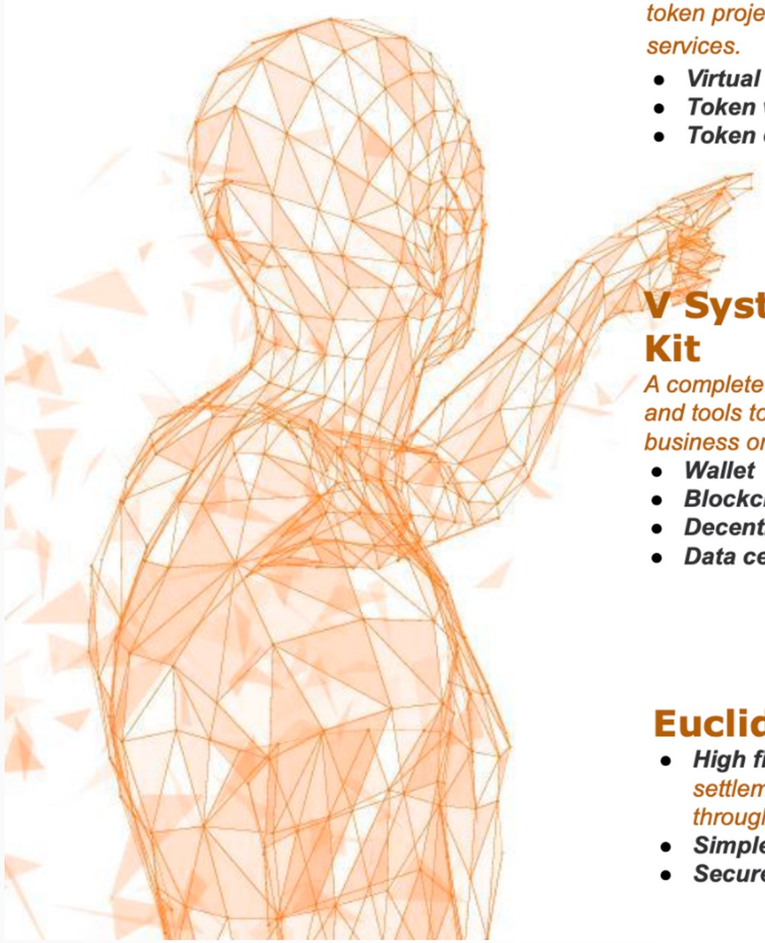


Environmentally Friendly

Speed, Scalability, and Security

Customizable Solutions

Our Technology



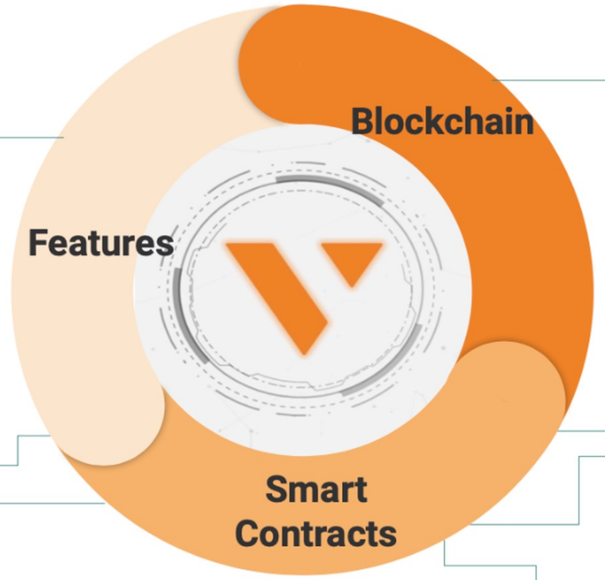
V Cloud Services & Marketplace

Reduces barriers to entry for developers and token projects with a set of pre-built cloud services.

- ***Virtual server (VPS)***
- ***Token wallet***
- ***Token explorer***

A Blockchain Database for Finance

Powered by Supernode Proof of Stake:
We created a general purpose blockchain for finance that is responsive to needs for complex applications and huge amounts of data.



V Systems Tool Kit

A complete set of infrastructures and tools to kick start your business on blockchain.

- ***Wallet***
- ***Blockchain explorer***
- ***Decentralized messenger***
- ***Data center and more.***

xLumi

A Fast, Secure and Scalable Payment Channel with V Systems

- ***A second layer solution which enables efficient micropayments between parties at a very low cost.***

Euclid

- ***High finality*** *(<4 second settlement time and high throughput.)*
- ***Simple & Efficient***
- ***Secure***

VSYS 2

Fermat Smart Contracts was activated on July 31 2020 with 3 major pillars.

- ***Lock Contract***
- ***Non-fungible Contract***
- ***Payment Channel Contract***

Rieman

A set of DeFi smart contracts to enhance the interaction between tokens, and payment related contracts.

- ***V Atomic Swap***
- ***V Swap***
- ***V Option***
- ***V Stable Swap***
- ***V Escrow***
- ***Token V2***
- ***NFT V2***
