

The Responsible Gold Ecosystem is designed to deliver greater transparency, traceability, and accountability to the gold supply chain

Responsible Gold is 99.99% pure, conflict-free and responsibly sourced gold with blockchain-based, irrefutable proof of provenance and chain of custody transparency (physical format is XRG)

RESPONSIBLE GOLD SUPPLY CHAIN APPLICATION (RG SCA)

- Irrefutably tracks provenance and chain of custody from mine to market
- Fully automated, tamper evident IOT solution matches physical assets to digital data, recorded directly onto the blockchain
- Optimizes transparency, traceability and trust through the supply chain

RESPONSIBLE GOLD STANDARDS (Standards)

- Ecosystem participants adopt best in class ESG controls to protect against conflict financing, money laundering, environmental, social and labor issues
- Practical and user-friendly sustainability toolkits support adoption
- The Responsible Gold ecosystem is recognized by a UN Task Force as a positive contributor to the UN Sustainable Development Goals
