

BR Metals Pte Ltd

Your Trusted Partner in
Precious Metal Recycling

Do you know 1 ton of ore from Platinum mines typically only contains between 3 to 6 grams of Platinum?

However, there are at least **2000 GRAMS of Platinum Group Metals** that can be recovered from the same amount of **end-of-life catalytic converters**.

BR Metals is in the business of turning waste into precious resources.

As a leading processor of **catalytic converters**, **BR Metals** **reclaims & returns estimated 80,000oz.t** of **Platinum Group Metals** annually to the **Circular Economy**.

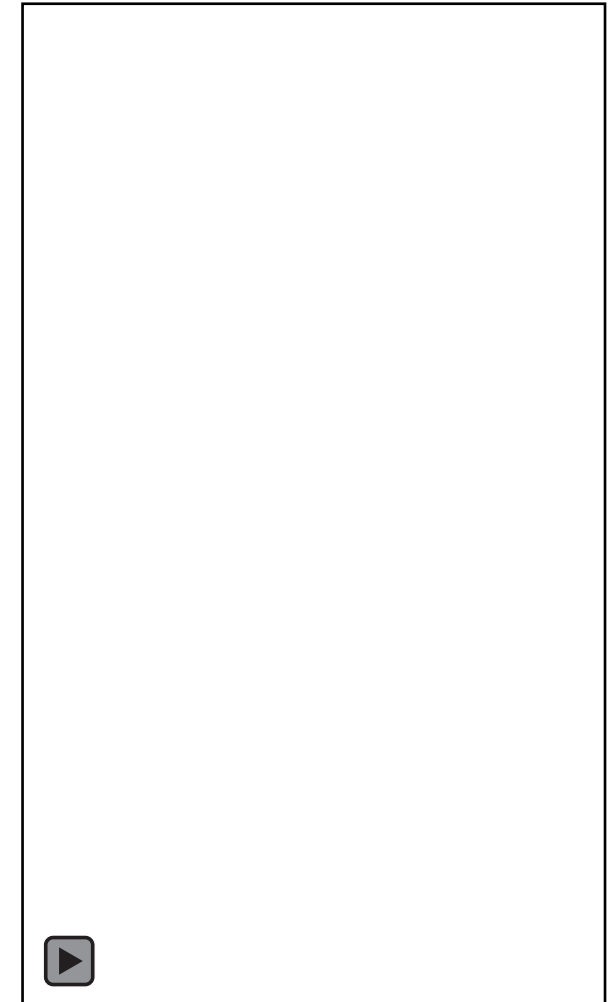

- In 2009, BR Metals Limited was founded in Guangzhou, China to meet growing market demand for professionalism and transparency in the collection, sampling and recycling of scrap materials containing platinum, palladium and rhodium.
- Headquartered in Singapore since 2014, BR Metals runs **2 semi-automated bulk sampling lines**, **3 analysis laboratories** in **Singapore**, **Guangzhou** and **Shaoguan**, a processing facility in **Malaysia** and representative office in **Thailand**.

Singapore & Shaoguan Facilities

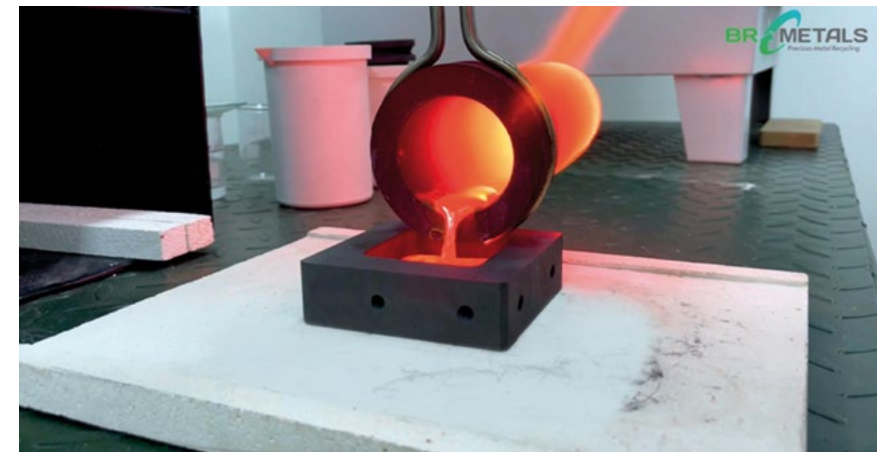

Process 720 & 3,000 tons/year of Spent Catalytic Converters

- **Sampling System** for catalytic converter recycling has 5 **patented components** proven to **reduce wastage, improve productivity** and **deliver best possible business outcome & environmental sustainability**
- **1 patent** for **lab automation** that **reduces analyses' error rate** from about 3 per hundred samples to about 3 per thousand samples. **Accurate, reliable analysis is a differentiator and crucial part of our business.**
- Upcoming **smelting & refining facility for PGM recovery** in Renhua, Shaoguan in Guangdong province, China.

Lab-Scale Gold & Silver Recovery Service recovers 30,000oz.t each month in 2022

- **Lab-scale gold & silver recovery service** launched in early 2021 in Singapore
- Our recovery methodology is a combination of developing proprietary technology and building on what is available in the market
- In addition to gold and silver recovery, we also engage in in-house trading of precious metals

1-Stop Precious Metals Recycling

More than just buying and selling scraps, BR Metals combines **recycling service, market advice, proprietary hedging service** and **other financial instruments** in a **customized one-stop solution**.
